## History

The Ro Ern herd was originally established by Robert (Bob) Bloomfield on Havilah bloodlines in 1967. Purebred Devons continued to be bred at Ro Ern until the disastrous drought of the early 1980's when all stock were sold.

In 1982 the registered bull Iventure Civil Servant 3rd was purchased and in 1983 two heifers were purchased from Wombramurra thus re-establishing the Ro Ern Devon herd. Subsequent to these initial purchases genetics have been sourced from multiple Australian and overseas sources.

Artificial Breeding technologies are being used to maintain genetic diversity within the herd.

The herd has been an active participant in performance recording through Breedplan for well over a decade.

There has been no known use of Non Devon Genetics in the Devon herd throughout the development and continuation of the herd. All animals are of straight horned breeding.

J-BAS score 6
